Oasis Poker

Introduction

Oasis

Poker is a variation of Caribbean Stud Poker. The rules of Oasis Poker are the same as Caribbean Stud, except the player is allowed to exchange cards before the raise/fold decision, for a price of course. The game can be found mostly in eastern Europe, northern Africa, and Internet casinos using Galewind Software. Following are the complete rules.

Rules

The player makes an ante wager plus optional side bonus side bet.

Player and the dealer get five cards each. All cards are dealt face down, except one dealer card is exposed. The player may examine his own cards but sharing of information is not allowed. The player has the option to switch one card of his choice for the next card in the deck. There is a fee to do this, equal to the ante wager. This fee is non-refundable. The player may switch one of more cards. The price for switching depends on the number of cards switched, as follows: One card: 1x the Ante.

Two cards:

2x the Ante.

Three cards: 3x the Ante.

Four cards: 2x the Ante.

Five cards: 1x the

Ante.

If the player switches all five cards, then he must raise. The player may either fold or raise. If player folds, then he forfeits his cards, ante bet, and side bet (if made). If player raises, then he must make a raise wager exactly equal to twice the ante. The dealer will turn over his other four cards. The dealer must have an ace/king or higher to qualify. In other words, the lowest qualifying hand would be ace,king,4,3,2. If the dealer does not qualify then the player will win even money on his ante wager and the raise will push. If the dealer qualifies and beats the player both ante and raise will lose. If the dealer qualifies and loses to the player then the ante will pay even money and the raise according to the Raise Pay Table below. Other pay tables have been known to exist. If the player and dealer tie then both the ante and raise will push. The bonus bet win will be entirely based on the poker value of the player's original hand.

Standard Raise Pay Table Hand Pays Royal flush 100 to 1

Straight flush 50 to 1 Four of a kind 20 to 1 Full house 7 to 1 Flush 5 to 1 Straight 4 to 1 Three of a kind 3 to 1 Two pair 2 to 1 All other 1 to 1

Strategy

I have never

quantified a perfect card switching strategy. My program makes a perfect decision every time by analyzing all possible combinations of the replacement card and all four dealer cards. However, from running through some test hands I believe the following strategy is close to optimal.

The player should switch one card with any of the following:

Four

to a straight flush and royal flush, even breaking up a pair Four to a flush with no pair. Four to an outside straight with no pair.

The player will sometimes switch with any of the following:

Four to a flush with a low pair (depends on the pair and dealer's

up card). Four to an inside straight with no pair (depends on the inside straight and dealer's up card).

My apologies for not being more specific. In my view there, is not enough demand for the information to warrant doing a more detailed strategy.

Do not

switch with two pair or three of a kind.

If the casino allows switching two or more cards that option should never be taken.

Once the switch decision has been made the

player can follow Caribbean Stud Poker strategy when deciding to raise or fold.

Odds

The following return table is based on the pay table above. Other pay tables are known to exist, which would change the odds.

Return Table Event Switch Pays

Combinations Probability Return Player wins with royal flush No 201 703909080 0.000001

The lower right cell shows a house edge of 1.04%.

After

possibly switching and raising, the average final bet, including the switching fee, will be 2.183772 units. The element of risk is thus 0.475%. On average the player will switch 8.4% of the time.

At Internet casinos using Galewind Software there are some rule changes. There the player may switch one to five cards, for the price of one ante per card, and a full house pays 6 instead of 7. Under those rules the house edge is 1.204%, the average final wager is 2.184 units, and the element of risk is 0.55%.

Side

Bet

I indicate the odds of the side bet in my Caribbean Stud Poker section. Some casinos have been known to base the side bet on the hand after switching. This can be a very good rule for the player. However, if you see it, you're on your own.

Belgium

Variant

In Belgium the player is allowed to switch a card, but if he does, he forfeits his option to fold. That version of the rules is addressed in my section on Belgium Variant of Oasis Poker.

Nicaragua Variant

Oasis Poker is very popular in Nicaragua. It seems to have more placements than any other game. However, they call it Caribbean Stud Poker. The pay table is the standard one for the original hand. However, it is depressed if the player switches a card, which still costs the price of the Ante bet.

This variant has never been analyzed, as far as I know.

Nicaragua Variant Pay

Table Hand Original

Hand After

Discard Royal flush 100 50 Straight flush 50 20 Four of a kind 20 10 Full house 7 5 Flush 5 4 Straight 4 3 Three of a kind 3 3 Two pair 2 2 All other 1 1

As a variant of the Nicaragua variant, the Palms casino in Managua lets the player buy a sixth card for the price of the Ante, as opposed to discarding. This, too, has not been analyzed (sorry).

Finland Variant

At the Casino Helsinki the following rule changes are followed:

The player may exchange only one card from his hand with

cost of 1 x ante.

If the dealer doesn't qualify player may exchange one card from the dealers hand (see Russian Poker above) to make the dealer to qualify.

Jackpot Bonus

side bet available.

Jackpot Bonus payout

Royal Flush: Jackpot (minimum amount €20,000)

Straight Flush: 20% of the jackpot

Four of a kind: 250 for 1

Full House: 150

for 1

Flush: 100 for 1

Straight: 50 for 1

### Chelsea anuncia la contratación del defensa Tosin Adarabioyo

El Chelsea ha reforzado su defensa con la contratación del defensa Tosin Adarabioyo, quien llega al equipo proveniente del Fulham. La transferencia se ha realizado de forma gratuita y el jugador ha firmado un contrato por cuatro años.

Tosin, quien rechazó una fuerte oferta del Newcastle, es el primer refuerzo del equipo desde la llegada de Enzo Maresca como entrenador jefe.

#### Un refuerzo esperado

Maresca trabajó con el defensa en el Manchester City y cree que Tosin encajará perfectamente en su estilo de juego. El jugador es hábil con el balón y su altura será valiosa para el Chelsea, que tuvo dificultades para defender los centros y tiros libres la temporada pasada. El equipo ha contratado al entrenador de tiros libres del Brentford, Bernardo Cueva, para abordar esta debilidad.

Tosin, quien ha mostrado un buen progreso desde su llegada al Fulham en 2024, es considerado un buen fichaje debido a su amplia experiencia en la Premier League y su eficiencia económica.

## Un reemplazo necesario

El Chelsea buscaba un defensa central después de permitir que Thiago Silva se fuera libre. Tosin se espera que compita por un lugar en el once titular con Benoît Badiashile, Levi Colwill, Axel Disasi y Wesley Fofana, quien se está recuperando de una lesión de rodilla a largo plazo. Trevoh Chalobah, quien es pretendido por el Manchester United, está en la lista de transferibles.
