Bonus 9 Rounds & Bonus

Features

Bonus symbols trigger bonus rounds and extra spins. Some free slots, no

download, no registration, offer stacked 9 wild symbols, and other gaming perks

associated with a bonus offer.

**Wilds:** These are symbols replacing all symbols except scatters. They complete a winning combination and act as multipliers. Wilds may appear sticky, expanding, shifting, or transferring wilds depending on the gambling machine. All kinds of wild symbols help players earn more thanks to additional combinations of symbols. **Volatility:** A risk measure inherent in slot machines, high RTP values close to 100% are low volatility pokies and vice-versa. The higher the return percentage is, the less volatile slot machines are. **Scatters:** These trigger bonus spins and rounds when 3+ scatters appear on the reels. Expanding scatters also appear to complete a winning combination, except that they don't substitute any symbol. Scatter symbols cannot be replaced by wilds but may appear as them. **Bonus games:** These are in-game features helping to increase your winning chances triggered by hitting 3 or more scatter symbols or 2+ other icons. They come in different forms: free spins, arcade, or bonus multipliers. **Gamble Features:** These are optional features presenting an opportunity to double winnings. Guess the card color that will appear to win 2x or 3x the bet value. Some pokie games offer even greater winnings if the player guesses the card's suit, not just the color. **Paylines:** These are the lines where a payout based on a winning combination is received. Some gambling machines have up to 243 pay lines; others have 1024 ways to win instead of a regular pay line. The more lines the player chooses, the more chances he has to win. **Progressive Jackpots:** These are jackpots that keep increasing in value by a predetermined amount from a pool of contributions whenever the game is played. Many casinos work on the same platforms, so the jackpot rises with the size of the players' bets. **RTP:** Return to Player value is a payback measure usually expressed as a percentage. RTP value is never 100%, but some gambling machines have up to 98% RTP. Thus, in 98% of the spins, you will receive, albeit a minimal, but win. **Bonus symbols:** are responsible for bonus game triggering when three or more appear on the reels. These can be symbols with inscriptions or logos that perform a specific function in bonus games. **Paytables:** A payable shows potential payouts list in a gambling machine. It tells the value or coin number you'll win for a particular symbol combination. With its help, determine which rate can be more profitable. **Coins:** These are credits needed to wager on a bet line, coming in different denominations from a penny to hundreds of dollars to place a wager. Thus, they are the equivalent of real money in pokie machines. **Cascading Reels:** Also known as tumbling or falling reels, depending on providers. They create better visual appeal than traditional reels, allowing symbols to fall freely and creating consecutive wins on a single bet. Many are accompanied by a gradual increase in the multiplier with each disappearance of old and new symbols' appearance. **Split symbols:** These are single symbols occupying a single reel that double themselves to complete a winning combination. If they appear side by side on one line, they lead to a more significant win. **Nudges:** These are awarded randomly or after a spin completes a winning combination that almost results in a win but needs the last shot. Move the 3D reel into position with a nudge if you already have two matching symbols. With it, add the missing symbol and launch free spins or win the jackpot. **Pick me bonus:** Hides cash prizes, free spins, or multipliers. Gamers have a predetermined number of picks until they hit the "collect symbol," after which your game returns to the standard reels. You choose such a bonus yourself, affecting the further play in the bonus round.

**Multiple Free Spins: Best Bonuses**

Get free spins in a

slot machine by spinning matching symbols on the reels. Most gambling machines release free spins when appropriate matching symbols appear. See the different reel combinations: Reels 1, 3 & 5 or 2, 3 & 4 or 3, 4 or 5. Scatter symbols are the chief icons triggering extra spins. Some pokie games allow you to increase the number of free spins during the bonus game. If players have collected three more scatter symbols

during the round, then the players 9 will win several more free spins. Sometimes this number can reach several tens, depending on the number of scatter symbols. 9 Additional free spins are added and started automatically.
