We would all love to chance upon a fail-safe system that lets us win at the Roulette table every time 9 we set foot in a casino. But, alas, such a system is extremely difficult to locate.

That is, unless your name 9 is Gonzalo Garcia-Pelayo. Senor

Garcia-Pelayo is a hero to many common or garden gamblers by proving that the house can 9 be beaten if you are clever enough and have unlimited reserves of work ethic.

A

talented mathematician, Garcia-Pelayo bet on a 9 hunch about the fairness of roulette wheels and won!

There are many famous well used roulette systems but the reality is, 9 there is a fixed margin built in to every spin that cannot be altered. There are certain online casinos that 9 offer a better roulette playing experience, but it's important to play there for the thrill and excitement and not be 9 deluded that there is a system that can beat the casino.

The story of how the only profitable roulette system was 9 uncovered and how the man that discovered it wonR\$1.5 million, is a tale that continues to inspire casino fans new 9 and old.

Who is Gonzalo García-Pelayo?

In a

departure from perceived wisdom, Mr Garcia-Pelayo was not initially attracted to the bright lights 9 of Madrid's betting dens.

Indeed, Gonzalo, born in 1947, was more of a

film fanatic than a connoisseur of the Roulette 9 Wheel. The film industry was where Garcia-Pelayo first made his mark. Studying at the Official Film School of Spain,

Gonzalo 9 was well on his way to graduating when the school closed through a lack of funding. However, never to be 9 deterred by short-term problems, Gonzalo set about a career in the creative arts sector.

This pathway saw Garcia-Pelayo begin work with 9 the

National Radio. Such a high-profile post provided access to a whole host of Spanish recording stars.

It is no surprise that since this period the gambling don has produced music for the likes of Alameda, Smash, Triana, and Maria Jiminez.

This path eventually

led Pelayo to work his magic in the film industry. However, his influence over the music sector, and in particular, his contribution to developing the Andalusian rock scene, means that Gonzalo will always retain great significance within the Spanish cultural community.

Although Pelayo's impact on the arts can be classified as being impressive, his significance to the gambling industry can only be viewed as being jaw-dropping.

Gonzalo became synonymous with Roulette in the 1990s. As the head of a Garcia-Pelayo family coup, Gonzalo was instrumental in designing a statistical model that could predict the pattern of Roulette results based on the slight idiosyncrasies that traditional reels tended to hold. Between 1991 and 1995, the family backed their hypothesis and claimed a profit of over 250 million pesetas (2.3 million NZD).

The

lion's share of this prize was gained at Madrid's Gran Casino. Pelayo is reported as saying that this particular casino was both his "greatest enemy" and his "laboratory".

Allowing Gonzalo and his family to test the theories that they had developed and to eventually make this information pay!

The discovery that roulette wheels all performed

differently due to small design errors was made completely by chance.

Initially,

Gonzalo wished to understand how croupiers placed balls at the start of every roulette spin. Wondering whether this action might be the key to determining the final outcome of each round.

Gonzalo's nephew acted as the research assistant in this quest. Key data compiled included the names of the croupier and the numbers that were called for each spin. When Gonzalo analysed this data he was surprised to see that some individual numbers are hit much more than others. For Gonzalo, this suggested that it was not croupiers who had an influence over the outcomes, but defects in roulette wheels themselves.

How did Gonzalo Garcia-Pelayo decide that the roulette wheel was biased?

After months of study, it was determined that García-Pelayo was correct. All roulette wheels were biased to a certain extent.

Once confirmed, Gonzalo and his team,

headed by his graduate son Ivan, set about backing his hunch. This led to the family making profits of up to a million pesetas every day for a whole month. Although, as Gonzalo later pointed out, this was not glamorous work, instead it was "a blue-collar job" with "12-hour days".

Explaining roulette wheel bias: Can you still profit today?

The position of García-Pelayo within the annals of gambling folklore is secured forever. But what was it about the psychics of a roulette spin that allowed the Pelayo family to profit from some of the world's most famous casinos, consistently, for years?

Wheel bias occurs whenever roulette outcomes deviate from long term expectations.

Bias can occur for all manner of reasons.

Wear and tear to the drum of

the roulette wheel may not happen uniformly. A damaged 9 wheel shaft, or loose frets in the pocket dividers, may hamper the true progress of a roulette ball.

Because of this,

9 the wheel may deliver a selection of results that do not conform to standard patterns. These inconsistencies are normally difficult 9 to spot in real-time, however, when large scale evaluations are made it may become apparent that the roulette ball lands 9 more often into particular sections of the wheel.

Once you are certain that a wheel displays

bias, you can go about 9 profiting from this information by betting on favoured areas.

However, you also need to bear in mind that detecting bias does 9 not guarantee instant success.

You might tip the balance in your favour by a per cent or two, but generating profits 9 from this advantage is a timely process. Therefore, before you embark on a strategy to bring the house down, you 9 need to be backed by a significant staking pot to finance your exploits until results in the real world begin 9 to match those observed during your spell of research.

But is it possible to follow the lead of

the Garcia-Pelayo and 9 profit from any equipment defect that you detect?

It may still be

possible, but such is the technological advancements in the 9 manufacture of Roulette Wheels that such pursuits may be increasingly difficult to profit from.

Casinos now

commonly utilise Starburst roulette wheels. 9 The Starburst variety incorporates metal frets, which degrade at a much slower rate when compared to wooden counterparts, and shallower 9 pockets, which are less likely to endure discernible wear.

Unfortunately,

this means that even if you were intelligent enough to embark 9 on a similar research programme to the one instigated by the Garcia, it may now take thousands of spins until 9 any sort of biased behaviour can be determined.

What is even worse, is that casinos now

track all Roulette outcomes in 9 the same way that Gonzalo García-Pelayo did in the early 1990s.

As soon as a casino detects any sort of bias 9 within an extended set of Roulette outcomes, the house will quickly ensure the wheel is changed so that savvy punters 9 cannot profit from this discrepancy.

In the world of online casinos, the chance of ever

being able to play at a 9 biased wheel is almost virtually eliminated. RNG (Random Number Generator) roulette games, see the outcome of every spin determined by 9 algorithms, with these algorithms designed to produce a series of results that would reflect those observed on a perfectly fair 9 table. Even in games where live croupiers preside, wheels are regularly changed so that any issue with bias is unlikely 9 to ever be detected by even the most cunning of bettors.

In essence, it is now not possible to do what 9 Gonzalo

achieved, however, it is unlikely to stop high-rollers from continuing to exploit deficiencies in the system if these come 9 to light.

How did Gonzalo Garcia-Pelayo take

advantage of roulette wheel bias?

Croupiers who worked the tables when Garcia-Pelayo

launched his most 9 daring raids still remember the outcome well, with a continuing sense of awe.

One anonymous casino employee recalls that the Pelayos 9 began to win big at the time that staff were engaged in a dispute with their bosses.

The labour dispute

centred on the distribution of 2.6 billion pesetas that casino staff accrued annually in tips, that casino owners wished to gain a larger share of. Because of this impasse, it is surmised that the Garcia-Pelayo were allowed to take advantage of casinos a little more easily than would have otherwise been the case. A couple of the casino's tables were thought to be in need of replacement and it was on these specific wheels that Gonzalo accrued the vast amount of his profits. Indeed, it is suggested that Garcia-Pelayo's system was never particularly profitable when it was employed at other venues.

However, there is plenty of evidence to suggest that the Pelayos were just as successful when they took their findings out on the road away from the Spanish capital.

A book about the success of the Garcia-Pelayo's suggests that they generated wins of 14 million pesetas in Vienna, 13 million in Amsterdam, and 40 million in Lloret de Mar.

However, as is often the case with gamblers that begin to strike it lucky, Gonzalo was no longer welcome in several of Europe's top casinos. For a while, Garcia-Pelayo got around this hurdle by sending associates into establishments to place bets for him, but it was apparent that Gonzalo had taken Spanish casinos to the cleaners to the tune of 60 million pesetas (520,000 NZ dollars) and the casinos were prepared to let him have no more.

To maximise his return from his endeavours, the Garcia-Pelayo family put their hypotheses to the test in casinos across the world, amassing returns of around 250 million pesetas (2.3 million NZ dollars) from venues in Las Vegas, Australia, Austria, Denmark, and Holland.

Following his worldwide tour, Garcia-Pelayo was a marked man and barred from nearly all global casino venues.

The end of a glorious chapter in the history of Garcia-Pelayo was reached.

What has Gonzalo

Garcia-Pelayo been up to?

When you are as multi-talented as Garcia-Pelayo you do not rest on your laurels for long.

Given the notoriety of the exploits of the Garcia-Pelayo clan, it stands to reason that a book documenting the family's battle with the casinos of the world would make compelling reading. So, it was no surprise, that in 2003 Gonzalo Garcia-Pelayo published the book entitled *The Fabulous Story of the Pelayos*. Although *The Fabulous Story of the Pelayos* was nominally an autobiographical account of the family's quest to bankrupt some of the biggest casinos in Europe, such was the fantastical nature of some of the content that it would be well received as a swashbuckling novel.

The dramatic nature of this account was subsequently picked up by executives at the History Channel, who later commissioned a documentary based on Gonzalo's literary musings. The series, called, *Breaking Vegas: The Roulette Assault*, showed the detail that went into Gonzalo's plan to take advantage of the weak points in the casino infrastructure and ultimately how this plan became the huge success that it did.

Even though casinos took steps to ensure that Garcia-Pelayo's strategies would no longer pay, this did not mean that Gonzalo was finished with trying to earn a cheap buck.

To this day, Garcia-Pelayo is using his abilities as an expert statistician to unearth value in all sorts of gambling pursuits. In recent years this has meant more of a focus on the sports betting industry. Gonzalo provides tips to a legion of fans on

all types of sporting fixtures and 9 lives off of the fees that he earns.

As the man who

has developed the only profitable roulette system in history 9 and who has profited to the tune of R\$1.5 million, there is no reason to suggest that the Garcia-Pelayo will not 9 continue to find success in every industry that they focus on.

If you want to test your

own strategies, you can 9 generate your own roulette wheels here, without risking any cash.

Activistas climáticos alemanes acuden a los tribunales por la "política climática inconstitucional" del gobierno

Los activistas climáticos alemanes están demandando al 1 gobierno por su "política climática inconstitucional", buscando construir sobre una victoria histórica de hace tres años que esperaban obligaría al 1 mayor contaminador de Europa a limpiar rápidamente.

Los activistas argumentan que la nueva ley climática es demasiado débil, que una actualización 1 reciente la hace más difícil de hacer cumplir y que la inacción del ministerio de transporte, que ha fallado repetidamente 1 en cumplir sus metas de emisiones, forzará medidas difíciles a grupos pobres en el futuro.

"Nuestra última victoria dejó claro que 1 tenemos derecho a la acción climática", dijo Luisa Neubauer, activista climática y figura destacada en el movimiento de huelga escolar 1 Fridays for Future. "Sin embargo, tres años después, el gobierno está fallando en tomar acciones necesarias."

Alemania, un gran fabricante de 1 automóviles que quema carbón para una cuarta parte de su electricidad, está en camino de caer justo corto de su 1 objetivo de reducir 65% menos de contaminantes que calientan el planeta en el aire en 2030 que lo que lo 1 hizo en 1990. Su corte supremo dictaminó una versión anterior de su ley climática parcialmente inconstitucional en 2024 cuando Neubauer 1 y otros activistas ganaron un desafío legal.

Reprendido por el tribunal y amonestado por los activistas, el gobierno anterior actualizó la 1 ley para reducir las emisiones más rápido e incluir metas para cada sector. Pero este año – bajo

presión del 1 Partido Democrático Libre de mercado, un socio de coalición menor que controla los ministerios de transporte y finanzas – el 1 actual gobierno eliminó los objetivos sectoriales, debilitó los requisitos para acciones de atrapado y redujo la presión legal para planificar 1 más allá de 2030.

Liz Hicks, investigadora legal en la Universidad de Münster, dijo que "visiones conflictivas" sobre la acción climática 1 dentro de la coalición gobernante habían dificultado hacer cumplir la sentencia de 2024. "La [última] enmienda la hace más difícil 1 implementar los objetivos en la Ley de Protección Climática, incluso si existen sobre el papel."

La decisión anterior consideró que la 1 ley climática antigua de Alemania era inconstitucional porque violaba "libertades intertemporales" – transfiriendo la carga de la acción rápida a 1 generaciones futuras – pero se abstuvo de decir que el gobierno había fallado en sus obligaciones hasta ahora.

Desde entonces, los 1 vigilantes científicos alemanes han documentado repetidamente brechas entre objetivos y acciones en sectores de la economía como transporte y edificios. 1 El Consejo de Expertos sobre Cambio Climático, un cuerpo establecido por el gobierno después de que se estableció la ley 1 climática, dijo que un plan de acción del ministerio de transporte para compensar sus deficiencias en 2024 era demasiado débil 1 para siquiera merecer una evaluación formal.

Los activistas argumentan que el gobierno ha "desperdiciado el presupuesto de carbono" en los tres 1 años desde el último fallo judicial. Apuntan a su rechazo de políticas baratas para reducir la contaminación, como establecer un 1 límite de velocidad general en las autopistas, como oportunidades perdidas.

Maxim Bönnemann, editor jefe de Verfassungsblog, una publicación académica sobre derecho 1 constitucional alemán, dijo que la demanda constitucional intenta "dar dientes" al principio de libertades intertemporales. "Alemania probablemente no cumplirá con 1 sus objetivos climáticos para 2030, lo que significa que los jóvenes tendrán que aceptar restricciones significativas en sus libertades en 1 el futuro si Alemania no hace su política climática más ambiciosa hoy."

Un portavoz del ministerio alemán de cambio climático y 1 economía dijo que el gobierno federal está "convencido" de que la enmienda a la ley en abril fue constitucional. El 1 portavoz dijo que mejoró la evaluación de la política climática introduciendo un pronóstico anual de reducciones de emisiones, permitiendo más 1 informes del Consejo de Expertos sobre Cambio Climático y requiriendo ajustes si se perdieron objetivos dos años seguidos.

"Además, cada nuevo 1 gobierno debe adoptar un programa integral de protección climática dentro de los primeros 12 meses de su mandato", dijo el 1 portavoz.

Objetivo: dar dientes a la libertad intertemporal

La demanda, presentada por Fridays for Future junto con otros grupos ambientales incluyendo Greenpeace 1 y Germanwatch, también argumenta que las personas en áreas rurales y otros grupos socialmente desfavorecidos serán golpeados más duro por 1 medidas más difíciles necesarias para compensar la falta de acción hoy.

"La inactividad de hoy viola derechos fundamentales", dijo Roda Verheyen, 1 abogada de los activistas. "Estamos entrando en una situación en la que la libertad es solo una cuestión de la 1 billetera."

La demanda cita la reciente victoria en el Tribunal Europeo de Derechos Humanos de 2,400 mujeres mayores suizas que exigen 1 que Suiza haga su parte justa para detener el cambio climático porque su demografía es más propensa a morir durante 1 olas de calor. El tribunal dictaminó parcialmente a su favor – encontrando que el gobierno suizo había violado sus derechos 1 humanos con políticas débiles – pero los legisladores suizos rechazaron la decisión. Neubauer dijo que la situación en Alemania es similar 1 a la de muchas otras democracias liberales y espera que el caso cierre la brecha entre la retórica y la 1 acción en general.
