### Linux Poker Online

Linux is an open-source operating system which works in the same way as Windows or Mac OS X. It's popular with programmers, in particular, as it can be altered and improved for a variety of uses if you have the know-how.

Linux works on all computers (and a lot of handheld devices too), but as it's not as widespread as traditional systems, most poker sites don't support it.

But despite the relative lack of support among websites offering online poker, Linux players can still find ways around it.

### Linux System Requirements and Alternatives

The problem with a lot of real-money poker rooms is that they don't run special native clients in Linux, and most have no plans to make one, either. But that doesn't mean Linux users have to desert online gambling entirely.

There are certain ways around non-Linux sites. The easiest option is to download a program called WINE (look for v0.9.1 or later direct from the website: <http://winehq>).

WINE lets you run traditional Windows apps on Linux computers. It's not like a full-on Windows emulator, but it does let you play individual poker clients as and when you load them up.

### No Download Options

If WINE isn't your thing, non-download poker sites can be played via your Linux web browser. Just log on with your regular Internet poker username and password, and enjoy Flash poker games via your browser.

Luckily, media players like Flash operate on Linux again after a period being discontinued for Linux systems (download version 11.2, or the latest your machine can handle).

Meanwhile, Java-operated instant-play poker clients can also be played on Linux computers.

### Find the Best Linux Online Poker

While native clients for Linux poker online are hard to find in 2024, it doesn't mean users are frozen out.

At OnlinePoker, our list of top Linux poker online rooms for non-download or Windows is unrivalled on the net. It's easy to enjoy the same online poker; Linux users can also access the same, great welcome bonuses when they sign up.

Just scour our leading real-money Linux online poker reviews and pick a site that's right for you. We have the latest ratings on real money net sites with leading security, great software and the best range of poker gaming on the web.

### Are There Poker Sites Just For Linux?

Unfortunately, in 2024 there are few native options for Linux poker online. But as long as you're au fait with installing programs like WINE or Java onto your Ubuntu, Fedora or Red Hat system, there's no reason you can't crush Internet poker.

For great mobile poker online, Linux operators can also enjoy Texas Hold'em and other card games on the move via their handheld tablet or smartphone.

While poker websites are playing catch-up with offering all forms of online poker, Linux systems can still match their Windows and OSX cousins, and best of all, Linux systems rarely crash. It's great not having the worry of your PC shutting down when you're in the middle of a hand!

## Manchester City Triunfa Fácilmente ante Brighton y Acerca un Título Más

Hace casi diez años, Steven Gerrard resbaló y Liverpool perdió el control de su destino en la carrera por el título de la Premier League, permitiendo que Manchester City aprovechara la oportunidad y se llevara el campeonato.

En las últimas semanas, y especialmente desde que Arsenal y Liverpool perdieron en la jornada anterior, se ha hablado sobre si City puede tener su propio resbalón, algo que, en realidad, nunca ha sucedido previamente bajo la dirección de Pep Guardiola cuando el trofeo ha estado a su alcance, con el enfoque extremo durante la fase final.

La teoría, o quizás solo la esperanza de Arsenal, en particular, era que Brighton pudiera sacar algo del City. El equipo de Roberto De Zerbi solo había perdido dos partidos de liga en su propio campo durante toda la temporada. Aparte del partido en Tottenham, este parecía ser el desafío más duro restante en la defensa del título de City.

Los campeones dismantelaron esa noción de manera devastadora, con el juego prácticamente terminado cuando Phil Foden anotó con un tiro libre desviado después de 26 minutos y definitivamente sentenciado cuando anotó otro justo después del medio tiempo. Agregó brillo a otra excelente actuación individual; Foden ahora tiene 24 goles de City para la temporada.

## Un Juego de Dominio Total

Guardiola había estado quejándose durante mucho tiempo sobre el horario de City, diciendo después de la victoria en la semifinal de la Copa FA sobre Chelsea el sábado que pondría a sus jugadores "en la nevera" hasta la siguiente etapa de la carrera por el título. Lo que podría haberlos preparado para una noche húmeda y fría junto al mar.

A pesar de la lesión de Erling Haaland, City tuvo que dejar a un lado su cansancio colectivo y permitir que la adrenalina los impulsara. Sin embargo, fue De Zerbi quien tuvo problemas de

acondicionamiento físico. El entrenador de Brighton estuvo sin ocho de su equipo por lesión. La formación preferida de Guardiola ha sido siempre un tema de discusión entre los observadores. En el inicio, la batalla estaba en distillar la mezcla de De Zerbi porque otorgó una libertad extrema a Adam Lallana y Pascal Gross en los roles de mediocampo ofensivo central.

#### **Minuto Evento**

30 De Bruyne anota de cabeza  
38 Foden anota con un tiro libre desviado  
82 Álvarez anota con un remate cruzado

Brighton comenzó bien, haciendo preguntas, pero pronto se convirtió en un recuerdo distante, De Bruyne aseguró que City tomara el control con una pieza de técnica de cabeza maravillosa. Sí, técnica de cabeza. De Bruyne no anota muchos con la cabeza. De hecho, no anota ninguno con la cabeza. Este fue el primero de sus 68 en la Premier League con él.

¡Qué gol fue, llevando matices del famoso esfuerzo de Robin van Persie para los Países Bajos contra España en la Copa del Mundo de 2014! De Bruyne se zambulló y, utilizando sus músculos del cuello para generar poder en el balón, lo curvó hacia atrás sobre la
